Experience

AI Intern Jul 2026 – Present
Netixsol Pvt. Ltd.

- Work on Data Science, Artificial Intelligence, Machine Learning, and Agentic AI projects using Python and modern AI frameworks.
- Develop data processing, machine learning, LLM-based, and agentic workflows for practical software solutions.

Teaching Assistant / ICT Intern Sep 2025 – Jan 2026
National Textile University, Faisalabad, Pakistan

- Assisted programming and ICT laboratory sessions, debugging assignments and explaining programming and software engineering concepts.
- Supported practical work involving databases, programming fundamentals, and networking tools.

Freelance Software Developer Sep 2024 – Present
Self-Employed, Remote

- Develop software solutions and database-driven applications using C#, C++, Python, SQL, and modern development practices.

Projects

POS & Inventory Management System Jun 2025
C# | Desktop Application | Production-Ready

- Developed and deployed a POS system with inventory management, sales processing, billing, authentication, and reliable local data persistence.

Navi-Core AI – Pathfinding & Machine Learning System May 2026
Python | Artificial Intelligence | Machine Learning

- Built a maze-solving system using A* and BFS for optimal navigation, integrating machine learning concepts and real-time path visualization.

VFS Explorer – Virtual File System Simulation Jan 2026
C++ | Data Structures | Algorithms

- Built a command-line virtual file system using N-ary Trees for hierarchical directories and Tries for efficient file searching.

Student Information Management System Jul 2025
SQL | Database Design

- Designed a normalized relational database for student records, course enrollment, and academic performance using keys, constraints, joins, views, and complex SQL queries.

Education

BS Software Engineering 2024 – Present
National Textile University, Faisalabad, Pakistan
CGPA: 3.98/4.00 | Merit Scholarship Recipient

Technical Skills

Languages: C#, C++, Python, Java, SQL, JavaScript
Backend: Node.js, Express.js, REST APIs, CRUD, Authentication
Databases: SQL Server, MySQL, MongoDB
AI/ML: Artificial Intelligence, Machine Learning, Data Science, Agentic AI, A*, BFS
Software Engineering: OOP, DSA, SDLC, Agile, Database Design, Data Modeling
Tools: Git, GitHub, Visual Studio, VS Code

Certifications

- **Develop Generative AI Applications: Get Started** – IBM / Coursera Jul 2026
- **Backend Development: Node.js, Express, MongoDB & REST APIs** – Board Infinity / Coursera Jul 2026
- **Duolingo English Test (DET)** – Overall Score: 115/160
